Preface

In 1982 *Studia Liturgica* published a comprehensive index to the fourteen volumes of the journal that had so far appeared, and it has long been the desire of the editors to produce an updated version of that work. However, because the labors involved in such an undertaking were so great, the project was continually postponed. For that reason, we are enormously indebted to Mr. Gerrit Warnink for offering to put together this index as a personal tribute to Wiebe Vos. We are especially grateful because the task was made so much harder for him by the changing styles that have been adopted for the journal over the years, so that it was very difficult to create a completely consistent format for the index. It provides a fitting marker to the first thirty-five years of the life of *Studia Liturgica*, and we are certain that it will prove to be of great service to our readers for very many years to come.
